

## Des Moines WRF Raw Influent

Sample collection date: **October 19, 2022**

### SARS-CoV-2 virus in wastewater

<b>DETECTED</b>	Virus concentration (copies per liter of sewage) <b>759,896</b>	Effective* virus concentration (copies per liter of sewage) <b>210,844</b>
-----------------	---	--

*\*Effective virus concentration value is derived by adjusting the raw virus concentration to account for dilution and other factors.*

### Effective virus concentration over time

### Overview of effective virus concentration levels

State-level mean of samples (collected in the past 2 weeks)

Color indicates effective virus concentration level

Your state outlined in red

### Effective virus concentrations trend with new cases

### Effective virus concentrations in comparison

Your sample has higher concentration levels than **17%** of all quantifiable samples collected in the past two weeks.
